

The Career-related Programme at a glance

The International Baccalaureate (IB) Career-related Programme (CP) is an innovative international education pathway that offers a rewarding blend of academic subjects and career-related studies. Tailored to students who want to focus on career-related learning in the last two years of secondary school, the CP develops applicable, transferable, lifelong skills that prepares them for higher education, apprenticeships or employment.

A flexible educational framework

With the CP, schools are able to create their own distinctive version of the programme and select career pathways that suit their students and local community needs.

Career-related studies

The CP offers schools the flexibility to select the career pathways they want to offer, such as:

business

engineering

health and bioscience

art and design

sports management

and more ...

Academic rigour

All CP students are required to take at least two Diploma Programme (DP) courses. Typically, the DP courses selected align with students' chosen career pathways.

Unique CP core

CP students must also complete four core components—language development, personal and professional skills, service learning and a reflective project—in order to receive the International Baccalaureate Career-related Programme Certificate. Designed to enhance critical thinking and intercultural understanding, the CP core helps students develop the communication and personal skills necessary for success in the 21st century.
